

Security Assessment & Action Plan

Who Should Consider A Security Assessment?

MMY's **Security Assessment** is designed for small to mid-sized businesses that have over 20 PC's throughout their organization. If you have concerns about the integrity of your IT systems, poorly used – or non-existent security policies or have experienced recent security breaches, MMY's **Security Assessment** should be considered. Even if you think your current security system is adequate, our low-cost, effective assessment can validate that belief, plus provide you with peace of mind knowing for sure that you're information is secure.

How Does It Work?

MMY's will sit down with you in order to understand what your current environment looks like from 3 levels: *People*, *Processes* and *Technology*. We will use our knowledge, process and tools to assess your organization. Our methodology and experience allows us to accomplish this in a much shorter amount of time and in a less expensive manner, while at the same time providing you with a more comprehensive look at your organization.

How Long Will It Take?

MMY's is able to accomplish the **Security Assessment** in only 5 business days. Approximately half of the time will be spent observing on site, and the other half in our office.

What Does The Assessment Process Include?

MMY's will...

- ◆ Interview up to 5 key individuals
 - ◆ Review up to 2 physical locations
 - ◆ Evaluate all system security documentation
 - ◆ Review all applicable process documentation
- Create report with actionable, prioritized findings

Helping you build a better, secure business

What Are The Deliverables From The Effort?

MMY's holistic approach is designed to – in a very short amount of time – identify the 'weakest links' regardless of the type or nature and most importantly, provide action items to address them.

Benefits of the offering are:

- ◆ **Identification** of risks at all 3 levels
- ◆ **Actionable Plan** you can implement or have MMY help you implement
- ◆ **Documented** recommendations for auditors
